HEXAWARE

Mavericks GenAI Designathon

April 2026

HEXAWARE

Mavericks
Designathon

Key Objectives

Strengthen Problem-Solving

Structured problem identification, creative ideation, and rapid prototyping through design-led, outcome-driven approach.

Accelerate Gen AI Adoption

Build confidence and capability to effectively leverage Gen AI tools and frameworks in day-to-day work.

Foster Innovation

Promote cross-functional collaboration, knowledge sharing, and creative thinking through team-based challenge-solving.

HEXAWARE

Learning and Growth

How the Designathon cultivates capabilities and drives sustainable impact

01

Experiential Learning

Hands-on experience through real business challenges

02

Structured Problem-Solving

Design thinking approach to tackle complex issues

03

Rapid Skill Development

Accelerated learning in Generative AI and emerging technologies

04

Cross-Functional Collaboration

Knowledge sharing across diverse teams and perspectives

05

Innovation Mindset

Creativity, experimentation, and ownership of solutions

06

Sustainable Growth

Future-ready capabilities delivering business impact

GEN AI DESIGNATHON – WEEK WISE PLAN.

1 WEEK

Start Date: 17 Apr 2026
End Date: 24 Apr 2026
Phase: Registration
Key Activities:
Team registration
Participant onboarding
Deliverables:
Registered teams list

WEEK 2

Start Date: 27 Apr 2026
End Date: 3 May 2026
Phase: Ideation & Planning
Key Activities:
• Release problem statements and app ideas
• Define solution approach and application architecture
Deliverables:
PPT Submission including:
• Problem statement & solution
• Proposed architecture
• Technology stack
• Gen AI use cases
• UI wireframes
• Development timeline

Only teams submitting the PPT are eligible for AI tool licenses

3 WEEK

Start Date: 4 May 2026
End Date: 10 May 2026
Phase: Core Development
Key Activities:
• Develop core application features (70–80%)
• Build UI/UX components (50–60%)
Deliverables:
Working application with core functionality

WEEK 4

Start Date: 11 May 2026
End Date: 15 May 2026
Phase: Final Prototype & Demos
Key Activities:
• Refine UI/UX
• Integrate Gen AI features
• Prepare demo walkthrough and documentation
• Demo Day: 10-minute demo + Q&A
• Judging and winner announcement
Deliverables:
Final Prototype (≈80% complete):
• Core features implemented
• Polished UI/UX
• Gen AI integration
• Basic documentation

HEXAWARE
Mavericks
Designathon

HEXAWARE

Recognition and Incentive Framework

₹50K
Vouchers

Awarded to top-performing team in each application category

7
Winning Teams

Recognized across 7 distinct application categories

Mentors & Evaluators

Formally acknowledged for ongoing support and valuable contributions to the Designathon

All Participants

Rewards in form of goodies and/or AWE points as token of appreciation

HEXAWARE

Webinar Details

Gen AI webinars planned in Week 1 and Week 2 featuring hands-on sessions

- Python Basics for AI and Automation
- Fundamentals of Gen AI
- Agentic Frameworks
- Implementation of Tool-Using Agents
- MCP Server for Efficient & Fast Agents
- Monitoring & Observability

Evaluation Criteria

HEXAWARE

Criteria	Weight (%)	Description
Functionality & Completeness	30	Solution meets the defined requirements, core features work end-to-end, and the application demonstrates ~80% completion.
Gen AI Utilization	20	Effective, relevant, and working integration of Gen AI to enhance functionality as per the proposed use cases.
Innovation & Creativity	15	Original thinking, novel feature ideas, and a creative approach to solving the problem.
UI/UX	15	Intuitive, user-friendly interface that is visually clean and broadly aligned with submitted wireframes.
Code Quality & Engineering	10	Clean, modular, well-structured, and maintainable code with appropriate comments.
Cost Efficiency	10	Conscious and optimized use of Gen AI and supporting tools (model choice, API usage, prompt efficiency, cost-awareness).

HEXAWARE

Designathon Applications

Eight distinct platforms addressing key business challenges

- Maverick Feedback 360
- Maverick Talent Insights
- Intern Flow
- Maverick Certify
- Maverick Inventory
- Maverick Certification Hub
- Maverick Execution Platform

HEXAWARE
Mavericks
Designathon

Platform Descriptions

Maverick Feedback 360

Maverick Feedback 360 is an all-in-one feedback platform that automates feedback collection for Mavericks and Supervisors. It captures real-time training feedback post-session and performance insights after 3 months on projects. With AI analytics, automated reminders, and dashboards, it ensures 75–80% feedback completion and reduces manual oversight. The platform unifies training feedback, effectiveness tracking, and performance alerts, empowering L&D teams to make data-driven improvements in training and Maverick readiness.

Platform Descriptions

Maverick Talent Insights

Maverick Talent Insights is a Training Performance & Competency Tracking Dashboard designed to provide real-time visibility into the Maverick lifecycle—from onboarding to deployment. The platform automates tracking of training progress, assessment performance, competency development, and top performer identification, while offering AI-driven analytics and customizable dashboards for stakeholders. It reduces manual tracking efforts by 80%+, enabling data-driven decisions with role-based access, batch-wise analysis, and exportable reports.

Platform Descriptions

Intern Flow

Intern Flow is an AI-powered automation platform that simplifies unpaid internship management by digitizing the entire process—from referral intake and candidate evaluation to onboarding and closure. It replaces manual workflows with automated notifications, AI-driven resume parsing, e-sign NDAs, and seamless access provisioning, ensuring faster cycle times, 95%+ data accuracy, and full compliance. The platform also provides real-time dashboards and audit trails, making internship management efficient, auditable, and scalable.

HEXAWARE

Platform Descriptions

Maverick Certify

Maverick Certify is a cutting-edge Certification Management Application designed to streamline and automate the entire lifecycle of certificate creation, distribution, and tracking for training programs and events. With MaverickCert, organizations can effortlessly generate bulk certificates using customizable templates, distribute e-certificates via email with real-time tracking, and monitor LinkedIn postings to ensure compliance and enhance brand visibility. The platform eliminates manual processes, maintains structured historical records for each batch, and provides intuitive dashboard indicators for easy oversight. MaverickCert empowers L&D, Marketing, and Training Operations teams to focus on impactful engagement while ensuring seamless, scalable, and compliant certification management.

Platform Descriptions

Maverick Inventory

Maverick Inventory is a robust Inventory Management Application designed to revolutionize stock control and streamline inventory operations for organizations. The platform centralizes stock data management, enabling seamless Excel-based bulk uploads and real-time stock reconciliation. With MaverickStock, users can perform single or bulk stock distribution entries, ensuring accuracy and efficiency in stock tracking. The application incorporates a maker-checker approval workflow, allowing managers and authorized personnel to validate stock movements, reducing manual errors, and enhancing accountability. Role-based access control ensures data security, while comprehensive audit logs and approval history provide full traceability for compliance and auditing purposes. MaverickStock empowers teams to maintain accurate, up-to-date stock availability, fostering operational excellence and informed decision-making.

Platform Descriptions

Maverick Certification Hub

Maverick Certification Hub is an innovative Certification Drive Automation platform designed to transform the end-to-end management of certification initiatives. The application automates the creation and administration of certification drives, centralizing all drive details—such as timelines, sponsors, target audiences, and policies—in a secure, role-based repository. MaverickMAP streamlines candidate communication with automated email responses for registrations, eligibility updates, results, and voucher issuance, ensuring timely and consistent engagement. The platform features a powerful rules engine for eligibility validation, enabling automated and accurate voucher allocation based on configurable criteria. It eliminates manual errors and duplicate voucher distribution while providing real-time dashboards for tracking participation, pass rates, voucher utilization, and ROI. With comprehensive audit logs and exception handling, MaverickMAP ensures full compliance, visibility, and accountability, empowering organizations to deliver seamless, efficient, and scalable certification drives.

Platform Descriptions

Maverick Execution Platform

Maverick Execution Platform is a comprehensive Training Management System designed to manage and streamline end-to-end training operations with precision and discipline. The application centralizes training batch lifecycle management, candidate data, attendance tracking, assessments, trainer coordination, and feedback processes within a single integrated platform. Built to reduce manual effort and dependency on spreadsheets, Maverick Execution Hub automates reminders, notifications, and reporting while providing real-time dashboards and performance insights. By enabling structured execution, operational transparency, and data-driven decision-making, the application empowers trainers, coordinators, and administrators to deliver consistent, high-quality training outcomes at scale.
